However, we recommend that you try different settings to achieve optimum performance for your specific application.
Light-fastness	The fading time of inkjet ink is a direct result of the inks that you choose to use and the environment where the print is displayed. Contact the ink manufacturer for light-fastness data.
Finishing/Post Processing	No post processing or finishing is required. A clear fixative may be applied to enhance certain areas of the print. We recommend waiting 24 hours before placing the print behind glass.
